AMENDMENTS TO THE CLAIMS

Please cancel claims 1-26 without prejudice or disclaimer, and add new claims 27-35 as follows.

<u>Listing of Claims</u>:

1-26: Canceled.

- 27. (New) A method of producing reovirus, comprising the steps of:
- (a) contacting human embryo kidney 293 (HEK 293) cells with a reovirus under conditions which result in reoviral infection of said HEK 293 cells, wherein the reovirus is a reassorted reovirus;
- (b) incubating the culture of said infected cells for a period of time sufficient to allow for viral replication; and
 - (c) harvesting the virus produced.
- 28. (New) The method of claim 27 wherein the reassorted reovirus is a result of reassortment between reoviruses of different subtypes.
- 29. (New) The method of claim 27 wherein the reassorted reovirus is a result of reassortment between reoviruses selected from the group consisting of the Lang strain, the Jones strain, the Dearing strain and the Abney strain.
- 30. (New) The method of claim 27 wherein the reassorted reovirus is a human reovirus.
- 31. (New) The method of claim 27 wherein the multiplicity of infection in step (a) is selected from the group consisting of 10 or less, 5 or less, 1 or less, 0.5, and 0.1.
- 32. (New) The method of claim 27 wherein the HEK 293 cells are cultured as adherent cells.

33. (New) The method of claim 27 wherein the HEK 293 cells are cultured as a suspension.

- 34. (New) The method of claim 27, further comprising the step of freezing the harvested virus for storage.
- 35. (New) The method of claim 27 further comprising the step of lyophilizing the harvested virus for storage.
